ChiefERP_CapTalent, get introduced with **ChiefERP** specialized ERP solution for all the leading brokerage houses and TREC holders of DSE and CSE of the Capital Market in Bangladesh. The entire activity is based on a state-of-art stock market specific software platform called **ChiefERP_CapTalent** Manage. It performs key function like: Provides the client facing interface for users to manage their stock portfolio and place other market information, instant order execution); Provides the back office interface and database for account management, stock orders supervision, accounting, etc.

Mi-Fi@MicroFinance

ChiefERP's specialized product that's renowned as "**Mi-Fi**," a complete solution for MicroFinance Institutions and special funding enterprises.

Mi-Fi is an online loan management system developed for micro finance and lending companies. Manage all client loans and savings in one location. Send SMS to your borrowers. View detailed stats and charts. Download loan statements and reports. Manage expenses and payroll. Cloud based loan software that is secure and easy to use.

Mi-Fi includes all the tools needed to operate and manage your operation. Features include solicitation, loan application processing and approval, pull and save credit bureau, document prep, insurance and tracking, collections and reporting.

Mi-Fi software would go a long way in helping microfinance institutions (MFI's) in streamlining their service provision and management processes, if implemented. Microfinance institutions serve the purpose of being mini banks, for those who are not able to access the financial services offered by banks. They have smaller scale operations, and their transactions though quite considerable, are much smaller compared to those of commercial banks.

- Patient-centered approach
- User-friendly, easy-to-use & web-enabled applications
- Multilevel distributed hospital Information system
- Security & privacy (authentication, authorization, privacy policy)
- Integration
 - Patient identification
 - Single log-in
 - Use of controlled vocabularies for coding
 - Data consistency
 - Transparency
- Single enterprise warehouse data store
- Robustness, reliability, performance
- Scalability & Portability (open modular architecture, declared interfaces, etc.)

HappyMIS@Hospital

ChiefERP is a committed healthcare IT solutions partner, preparing hospitals to be future-ready through technologically advanced, patient-friendly and eco-friendly information management systems. Our **Hospital Information Management Systems (HIMS)** what we call **HappyMIS** is a powerful, flexible, intuitive and agile NexGen System. This enables hospitals to leverage international best practices and deliver high-quality results.
